

Jackson Konkin

4316 Blenkinsop Road, Victoria B.C, V8X 2C3 - (250) 921-5669 - jacksonkonkin@gmail.com

Education

University of Victoria – Victoria, B.C

September 2020 – Current

Bachelor of Software Engineering

University of Victoria – Victoria, B.C

September 2018 – March 2020

Bachelor of Commerce

Work Experience

Trail Beer Refinery, Trail B.C

May 2020 – August 2020

Delivery Driver/Brewery Assistant

- Ensured timely delivery to customers, assisted with/ran canning machine, stacked and organized pallets, organized warehouse

Grant Thornton, Castlegar B.C

May 2019 – September 2019

Junior Accountant

- Compiled financial statements, interacted with clients, organized invoices and bills, utilized software such as sage; Excel; and Word

Interests/Achievements

A+ Average Engineering Student

- I strive to achieve the highest grades possible while balancing a full triathlon training schedule. In my first year of engineering, I achieved an A+ average.

Data Science

- I have a strong interest in data science and its applications. I find the process of extracting insights from data fascinating and enjoy working with large data sets. I have experience using several data analysis tools, including Python and Excel, and am currently taking Googles online data analytics certificate course.

Professional Triathlete

- Complete 20-26 hours of training a week to compete at the elite level in the sport of triathlon, train with Olympians and other accomplished triathletes competing on the world stage, as well as run with the varsity cross-country team.
- Placed 30th overall in the world at the 2018 Denmark Aquathlon World Championships and 4th overall in the world at the Penticton Junior Aquathlon World Championships
- Recently competed against the world champion in Oceanside, CA

Skills/Competencies

Computer Hardware and Systems

- Manage time effectively, maintain discipline, work hard, solve problems, and stay organized. Possess the ability to quickly learn and teach myself new things

Programming

- Well-versed in Python and SQL and use Excel on a daily basis. Additionally, have experience working with a variety of other programming languages, including JavaScript, HTML, CSS, C, C++, and React

Software Development; Theory & Practice

- Experience with data structures and algorithms, which includes sorting and searching algorithms, data types, recursion, and graph algorithms. Experience in general software development, including designing and implementing software solutions, writing clean and maintainable code, and debugging and troubleshooting code issues

Data Analysis

- Currently pursuing a machine learning course and enrolled in the Google Data Analysis Certificate program to enhance understanding of data science applications
